

IN THE SPECIFICATION

Please amend the first paragraph of the Description of the Preferred Embodiment on pages 5 bridging to page 6 of the specification as follows:

The sheet feeder 10 has an adjustable height upper stripper wheel shaft 40 and an adjustable height upper discharge belt drive shaft 60. The height of the upper stripper wheel shaft 40 is adjustable by turning knob 29 on the top of the right side housing 20 or by programming the desired height in a controller 195 by use of keypad 22. Knob 29 is mechanically connected to a worm shaft 139 on the right bearing assembly 120 and to a worm shaft 239 on the left bearing assembly 130 by an adjustment rod 110 for turning both ball screws ~~139, 239~~ 236 at the same rate and at the same time to adjust the height of the upper stripper wheel shaft 40 at both ends so that the upper stripper wheel shaft 40 remains parallel to the opposing lower discharge belt drive shaft 50. The upper discharge belt drive shaft 60 is similarly adjusted relative to the lower discharge belt drive shaft 70 by means of knob 27.
